

100/150 INTERIOR SIGNAGE SERIES

The 100 Series consists of an impregnated colored plastic background layer with adhesive applied impregnated colored plastic copy on the surface. They can have radius or square corners and the braille will be done with raster beads. It will meet ADA requirements and is a cost effective system. The signs can be tape or screw mounted. If screw mounted, there would be 2 to 4 countersunk holes on each sign for installation.

6"x 8" 100 Series Room Sign
Black Background with White Copy

6"x 8" 150 Series Room Sign
2 Color Background with White Copy

The 150 Series offers a 2 color option. There is a standard color chart and custom colors are available. Please speak with your project manager to learn more about custom color options.

This 100/150 Series has a frame option that can be mounted with screws or tape and silicone. Frames are also plastic and available in a standard set of colors. The frames add dimension to the sign and give a more polished look. Window signs are also available in the 100 and 150 Series.
