

200 INTERIOR SIGNAGE SERIES

The 200 Series is a photopolymer sign that allows for tactile lettering and braille to be one piece with the background surface. The photopolymer process allows graphics, logos, custom letters and braille to be manufactured to your specifications for interior or exterior use. Backgrounds are painted any standard or custom matched color with an additional color for raised areas.

6" x 8" Standard Room Sign
Dark Brown Background with Oyster Copy

This series has a frame option or can be mounted with screws or tape and silicone. Frame can be a metal finish or a painted color. Color options range from black, silver, gold, bronze, almond and white.

Window inserts are also available with this series. The 300 series will meet all ADA requirements and will give your building an enhanced look at a reasonable price.

6" x 8" Standard Room Sign with Window Insert
Custom Orange Background with White Copy
