

# 300 INTERIOR SIGNAGE SERIES

The 300 Series is an ADA sign system that consists of a polycarbonate 1st surface membrane combined with an acrylic or PVC backer system. All text and characters are sub-surface and sealed so there is no chance of picking off, scratching or tampering with the text. This process makes the sign durable and an excellent sign choice for high-traffic areas such as schools.

*6" x 6" Standard Room Sign  
Burgandy Background with Oyster Copy*

*6" x 6" Standard Room Sign with Window Insert  
Dark Gray Background with White Copy*

Window inserts are also available with this series. The 300 series will meet all ADA requirements and will give your building an enhanced look at a reasonable price. Sign colors can be chosen from a vinyl selection guide.

The 300 Series has an aluminum frame option that will be screw or tape mounted onto the wall and the signs are precisely cut to fit tightly into the frames. The signs attach to the frame with magnetic strips. These signs are less likely to be tampered with and usually cannot be removed from the frame without the suction cup provided. Another benefit to this sign system is that there are no unsightly screw heads to interfere with the appearance of the décor. Several frame colors are available to choose from.

*6" x 8" Standard Large Room Sign  
Custom color with Black Copy*
